PROFILE

Full stack developer at Onvaca, a vacation-rental marketplace, working on a Node.js and GraphQL backend (MySQL, Redis, AWS) and a Next.js frontend. I have merged 850+ pull requests there, two thirds of them backend work on payments, reservations and pricing. I also build Riwaq, an open-source e-book reader with 1,150+ downloads.

SKILLS

- **Frontend:** React, Next.js, Redux, TanStack Query, Tailwind CSS, Tauri
- **Backend:** Node.js, Express, NestJS, GraphQL, REST, Socket.IO
- **Data:** MySQL, PostgreSQL, MongoDB, Redis, BullMQ
- **Cloud and payments:** AWS (S3, CloudWatch), Stripe, Paymob
- **Tools:** Git, Jest, Sentry, Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer

08/2024 – present

Onvaca – Travel Booking Platform 

- Implemented refunds, payouts and multi-currency logic across Stripe and Paymob, including FX snapshots and processor-fee accounting.
- Built reservation pricing and the Split & Share group-booking flow: shared payments, seat cancellations and refunds.
- Fixed GraphQL performance issues by batching listing loaders and resolving queries in parallel.
- Moved frontend code out of the API server, separating the backend from the original monolith.
- Shipped 300+ frontend and admin pull requests in Next.js and Redux.

Freelance Web Developer

2022 – 2024

- Built REST and GraphQL APIs on MongoDB and MySQL for clients.
- Delivered full-stack applications with React, Next.js and Redux.

EDUCATION

Bachelor of Computer Science

2020 – 2024

Beni Suef University

Beni Suef, Egypt

Faculty of CS and AI. GPA 3.1, graduation project graded A+.

PROJECTS

Riwaq (Creator)

- Offline-first e-book reader for EPUB, PDF and Word on desktop and Android: Tauri, Rust, React.
- 9 releases, 1,150+ downloads. Extensions reach the network only through an injected host API.

Feather Blog (Full-Stack Developer)

- Blogging platform with a [NestJS backend](#)  and a [Next.js 14 frontend](#) , documented with Swagger.
- Threaded comments, likes, drafts, tag search, a trending feed, Google OAuth and avatar resizing.

Chat Universe (Full-Stack Developer)

- Real-time chat with presence: a NestJS gateway over Socket.IO, MongoDB, and Passport JWT auth.
